

Elite Equine

DIGESTIVE AID

Registration No. V***** Act No. 36 of 1947

ELITE EQUINE DIGESTIVE AID: Digestive health has a direct impact on everything, including condition, attitude and performance. The digestive tract supplies essential nutrients to every other system in the body. When the digestive tract is in optimal condition, you give your Horse the opportunity to look and feel its best and perform to potential. A complete and balanced diet provides basic nutrients. The Performance Horse lifestyle i.e. stabling, intermittent feeding, training, travel and competition however, places additional demands on digestive health. Under these conditions, even good feed may not be sufficient. Elite Equine Digestive Aid maintains digestive health with specialized nutrients.

- Scientifically formulated supplement containing Proteins, Amino Acids and Fats to support complete digestive health
- Contains specialised nutrients to support the integrity and function of the entire digestive tract
- Contains nutrients needed to train hard, recover fast from exercise and perform to potential
- Provides ongoing nutritional support of a healthy and effective digestive tract
- Ideal for Performance Horses whilst on an active training program and competition
- Assists in maintaining a healthy appearance, temperament and performance
- Provides a natural, nutritional approach to digestive health

APPLICATION

The scoop provided measures approximately 16.66g of product when heaped. Top dress feed with three scoops (approximately 50g) of Elite Equine Digestive Aid twice each day during first week of use only, then 50g once each day thereafter.
